

GLS renews its commitment to environmental protection

By now it is common knowledge: our greatest ambition in the field of sustainability is to achieve **climate neutrality by 2045-50**, as stipulated in the Climate Protect programme. Of course, there is still a long way to go, but we are proud to say that from April 2022 we are **100 per cent** offsetting our CO₂ emissions in Europe.

One of the latest initiatives in support of the environment is the '**GLS Forest**', realised in cooperation with Treedom. It will enable the absorption of 1,435 tonnes of CO₂!

This project represents a gift from us to the environment, as well as a renewal of our

commitment to protect the Planet and offer a better world to future generations.

The GLS Forest comes to life in **8 countries**, thanks to the planting of **6,200** trees that Treedom will carry out for us in Kenya, Tanzania, Colombia, Malawi, Ghana, Cameroon, Ecuador and also in Italy. Our forest will consist of different tree species, including specimens of Avocado, Lemon, Passion Fruit, Papaya, Cashew, Cocoa, Mango, Banana, Coffee, Chestnut, Holm Oak and many more.
